

# TV VISJON NORGE – CONTRIBUTION AND WEBTV

TV Visjon Norway is a Christian television channel broadcasting 24 hours a day to viewers in Scandinavia. About half of the material is done entirely in-house and consists of taped studio productions and live broadcasts. Some are made in the headquarters in Drammen, other recorded or live broadcasted from festivals and conferences in Norway, Moldova and Israel. To do this in a cost efficient way with high quality Intinor has been entrusted to deliver a complete solution for contribution and webTV. The heart of the solution is a Direkt router

placed in MCR that makes it easy to receive live broadcasts from the Direkt links used in the productions. By Intinor technology TV Visjon can broadcast live over the Internet, mobile or satellite networks and always get good picture and sound quality even from the most inaccessible places. "We want to reach our viewers with quality in both content and broadcasting and Intinors platform creates truly professional opportunities for us at a very good price" says John Sanjee, head of the MCR.

"Direkt series is a robust platform which is critical for us. Since we also get scalability and great functionality along with world-class customer service and support Intinor Technology is perfect for us."

-John Sanjee, head of the MCR
